BCI Burke Partners With Empire Recreation In State Of New York

(Fond du Lac, WI) --- BCI Burke, with headquarters in Fond du Lac, Wisconsin, announces the addition of Empire Recreation to its sales team in the state of New York to provide playground, park and recreation resources.

Empire Recreation professionals have been involved in the playground and recreation business for over 25 years. With valuable experience from two respected playground installation-certified companies, the Empire staff is uniquely qualified to assist in areas beyond specifying equipment including site preparation, alternative play area ideas, or installation oversight.

“We are proud of our partnership with Empire Recreation because we have the same goal—a pledge to serve our customers with integrity, honesty, respect, a superior product, a commitment to child safety and exceptional responsiveness before, during and long after the sale,” says Tim Ahern BCI Burke owner/CEO.

Providing products in the United States since 1920, BCI Burke’s team is committed to designing, engineering and building only the highest quality playground, park and recreation equipment. Burke employs the longest, strongest warranties in the playground industry including 100-year limited coverage on posts, clamps, fastening systems and hardware; a 25-year limited warranty on spring assemblies and aluminum cast animals and a 15-year limited warranty on plastics.

Burke products meet or exceed the guidelines of the U.S. Consumer Products Safety Commission (CPSC) and the standards of ASTM International. In addition, Burke is a founding and active member of International Play Equipment Manufacturer’s Association(IPEMA), of which Ahern is the president-elect.

Regarding child safety, Burke is the only playground manufacturer that provides customers with a National Program for Playground Safety(NPPS) Safety Supervision Kit with every modular play structure at absolutely no charge.
