Commitment to environment earns ISO 14001 Certification for BCI Burke

FOND DU LAC, Wis.--([BUSINESS WIRE](#))--BCI Burke has received the ISO 14001 certification as a result of its commitment to environmentally sustainable operations.

The certification, which applies to environmental aspects over which the company has control, ensures that the company implements and maintains an environmental management system that complies with all applicable laws and regulations.

“We have long had a dedication to providing quality products with manufacturing processes that are sensitive to the environment. Our team embraced and rallied around the ISO 14001 program, showing enthusiasm that goes beyond simply meeting the requirements,” said Tim Ahern, chief executive officer and owner of BCI Burke.

Burke also participates in Alliant Energy’s “Second Nature™ Program,” which ensures increased use of energy from wind and other renewable sources. The company has even carried its environmental commitment over to the use of recycled materials in its estimated 56 tons of printed catalogs, meeting the standards of the Forest Stewardship Council.

BCI Burke, headquartered in Fond du Lac, Wisc., is a leading manufacturer of playgrounds and related products for schools, parks, day care centers and other agencies worldwide.
