

## MECHANICAL DESIGN ENGINEER

### Join the Movement!

Burke is growing rapidly and we're looking for a knowledgeable, energetic Mechanical Design Engineer to join our team and help us take play to a higher level.

### What Moves You?

We're not going to lie; this is an amazing opportunity. It requires hard work, a lot of innovation and enthusiasm and, of course, an abundance of *Purple Passion* (def. a love of play, bringing play to communities and specific love of Burke and those you work with)!

- **Product Development**

At Burke, every product is a new experience. We seek to design and develop the most innovative products to create and meet market needs. You will have the opportunity to bring new products from concept to production, including hands-on prototype development.

- **Project Management**

With each product developed, you will be able to manage and execute project plans, timelines and budgets while working with both internal and external teams to develop cost-effective and manufacturable products to help us drive the Play Movement forward!

- **Teamwork**

We have an awesome team at Burke and the right individual for this role will fit well within our culture of teamwork, straightforward and open communication. Oh, and you need to have a passion for play!

- **Added Bonus**

A unique opportunity to work in a *NEW* product development center with cross-functional teams! AND...AND...we get to test the products we develop. So basically, we play at work. Not all the time...but sometimes.

### Qualifications That Move Us

- 3 to 5 years of experience designing, developing, and launching new mechanical products and a proven track record of project management
- Proficient in 3D CAD software (Autodesk Inventor a plus), AutoCAD, and Microsoft Office
- Bachelor's degree from four-year college or university; preferably in Mechanical Engineering or another related technical degree
- Ability to define and solve problems, collect data, establish facts, analyze, draw valid conclusions, and then implement solutions
- Strong organizational and follow up skills, ability to multi-task, strong attention to detail and solid written/verbal communication skills to interact with internal and external team members
